SAINT LOUIS UNIVERSITY

SCHOOL FOR PROFESSIONAL STUDIES

## September 2024

In this issue:

Welcome

Hi! I'm Kim Dondanville, the Strategic Partnerships Coordinator at Saint Louis University's School for Professional Studies (SPS). As your point of contact, I am here to assist with any inquiries you may have regarding our programs, tuition discounts, or any other concerns. My objective is to make your transition back to school as easy as possible. Please don't hesitate to contact me for any assistance as you begin your educational journey with SPS.

# Learn more about our 100% online Computer Information Systems program

Dr. John Buerck; Director of CIS

Saint Louis University's degree or certificate in Computer Information Systems will help you prepare for your career with innovative, diverse, technology-based organizations in the ever-changing field of computer science and IT.

Careers in CIS:

- A computer information systems degree can prepare students for advanced studies or employment in the ever-changing field of computer science and information technology.
- According to the U.S. Bureau of Labor Statistics, the computer science and database industry is expected to grow by 12% through the year 2024, adding 488,500 new jobs. Job opportunities within this field have a broad range of salaries.

Computer Information Systems (CIS) is available at the undergraduate level, offering a B.S. degree along with a certificate option.

# Learn more about our 100% online graduate Information Systems program

With a Master of Science in Information Systems offered through Saint Louis University's School for Professional Studies, you'll gain the skills in software development, analytics, evidence-based decision making, ethics and leadership needed to provide technical expertise and strategic decision-making as an information systems professional.

Maria Weber, M.S.: Director of Cybersecurity and interim Director of Information Systems

Careers in Information Systems:

- SLU's Master of Science in Information Systems can prepare you for high-level jobs in technology, managing information system installations and leading information technology departments in large companies.
- According to the U.S. Bureau of Labor Statistics, Employment of computer and information systems managers is projected to grow 15 percent from 2022 to 2032, much faster than the average for all occupations.

Information Systems (IS) is available at the graduate level, offering a M.S. degree and a post-bachelor certificate option.

Learn more about our 100% online graduate Cybersecurity program

Offered through Saint Louis University's School for Professional Studies, our Cybersecurity curriculum will teach you to apply information security principles to analyze, detect and mitigate vulnerabilities and intrusions to your organization's cyber infrastructure. You will also gain a deeper appreciation and understanding of security and privacy's social, policy, ethical, and legal aspects.

Maria Weber, M.S.: Director of Cybersecurity and interim Director of Information Systems

SLU's master's degree in cybersecurity prepares you to manage and lead cyber teams and programs. Graduates of the cybersecurity program have the foundation necessary to succeed as network and computer systems administrators, government cybersecurity analysts, computer systems analysts, information security analysts, computer and information systems managers, and data security consultants.

Cybersecurity can be pursued at the graduate level as either a Master's degree or a post-bachelor's certificate.

Learn more about our 100 % online Cybersecurity Program

The Master of Cybersecurity at Saint Louis University is developed and taught by subject matter experts from prestigious government entities and Fortune 100/500 companies, offering unique industry insights and mentorship opportunities.
