MASTER OF SCIENCE ARTIFICIAL INTELLIGENCE

Are you ready to lead the AI revolution? Indiana Wesleyan University's cutting-edge Master of Science in Artificial Intelligence is designed for business leaders and innovators who want to harness the power of AI to drive transformation and success in their organizations.

Why Choose IWU's AI Program?

STAY AHEAD OF THE CURVE:

Artificial Intelligence is reshaping industries globally. Our program ensures you not only understand AI but master it to seize opportunities and outperform competitors.

HANDS-ON, REAL-WORLD TRAINING:

Gain practical experience with AI technologies to tackle real business challenges. Our curriculum is focused on equipping you with critical, in-demand skills that apply across all fields.

SPECIALIZATION IN DATA ANALYTICS:

Unlock the potential of your company's most valuable asset—data. Learn to navigate the market and make informed, rapid decisions that set you apart.

ETHICAL AND SUSTAINABLE AI LEADERSHIP:

Our faith-based approach teaches you to use AI safely, ethically, and sustainably for the greater good.

Who Leads the AI Program?

Dr. Clark Cully is helping IWU re-invent business education by integrating technology and leadership to navigate AI by integrating this technology across the entire curriculum and addressing AI concerns from a faith-based perspective. Dr. Cully's experience as Deputy Chief Data Officer for the Department of Defense for 14 years provided opportunities for him to lead the department's AI policy and governance and is excited to share his experience and knowledge with IWU students who wish to lead with integrity in the business world through AI.
